Instructions on using the Amsler Grid

1. Wear your reading glasses.
2. Cover one eye.
3. Look at the center dot and keep your vision on it at all times.
4. While looking directly at the center, and only the center, be sure that all the lines are straight and all the small squares are the same size.
5. If you should notice any area on the grid that becomes distorted, blurred, discolored, or otherwise abnormal, please call us right away.
6. Do this for each eye.

Amsler Grid

For any new distortion of the lines or black (blank) spots on the grid
you need to be evaluated within 3-4 days.
